The Bitter Truth was established by passionate bartenders Stephan Berg and Alexander Hauck in idyllic Bavaria in 2006.

Their intention was to supply bar aficionados with cocktail bitters that have not been seen in a century.

Both men gained experience making small batch cocktail bitters for the bars they represented.

For years Stephan has been collecting ancient cocktail books and authentic bitters from the late 19th and early 20th century, and these were the inspiration for their first choice of cocktail bitters flavors.

Alexander, who is also a graphic designer, created the distinctive look and feel of the brand.

The bitters are specifically designed for recreating classic drinks made true to the original recipe or for experimentation with modern cocktail creations.

The range of bitters grew steadily and The Bitter Truth expanded their collection to include products like liqueurs and flavored spirits; again, produced using only the best quality natural ingredients.

The Bitter Truth have received multiple awards for their products and continue to innovate in their beloved bar world.

In 2007 The Bitter Truth started working with Haromex Development, an independent family company established in 1992, based in Brueggen, Germany.

Since 2009 Haromex is the exclusive worldwide distributor for all of their products and the pivotal point for all market management of The Bitter Truth.

The company now focuses on bringing the world’s best bitters to professional bar and F&B staff as well as consumers who intend to enhance the overall drinking experience of cocktails and mixers they create.
When the first settlers came to America in the 17th century they couldn’t rely on professional medication.

Bitters were considered as medicine not as a beverage.

Some day bartenders started using bitters in mixed drinks to improve them since good quality spirits were hardly available in the 18th and 19th century.

That is why bitters became so popular and the defining ingredient in a drink category called »Cocktails«.

The use of bitters underlined the healthy benefit of the cocktail and added additional flavors and complexity.

Since water wasn’t as clear as it is today and contained germs and other bacteria, cocktails with bitters were already consumed in the morning to offer some protection.

Before 1906 bitters were sold as »patent medicine«.

Outrageous claims concerning the healing powers of bitters were made by producers.

In the USA the »Pure Food and Drugs Act« (1906) was passed to put a halt to false claims. Bitters lost their reputation as medicine.

In 1919 prohibition was adopted in the USA and almost all domestic bitters brands disappeared.

While cocktail culture in the USA almost died out, it was getting more popular in Europe.

Drinks were simplified and bitters were omitted.

Due to a change in consumers’ taste, lighter and less aromatic drinks were in demand in the years after prohibition.

The end of the 20th century brought a renaissance of the cocktail.

To recreate classic cocktail recipes, long forgotten ingredients – like bitters – were revived.

The Bitter Truth has played a determining role in the revival of those classic ingredients.
Maceration & Percolation:
Extraction of flavors by soaking ingredients in alcohol or water

Long extraction period:
Depending on the product the maceration process can take up to 2 months

Only ingredients of highest quality are used for The Bitter Truth products

Maturation period:
The product is then filled in casks for harmonization

As a last step the product is eventually tinged, filtered, bottled and labeled

It’s valuable and time-consuming to produce The Bitter Truth - Cocktail Bitters. Our traditional manufacturing process guarantees an unparalleled and superior taste. Only the best quality is released to our customers!

BOGART’S BITTERS can arguably be said to have started the cocktail movement as it was the first ever mentioned bitters in the very first cocktail book published in 1862, written by the most famous bartender of those days, Jerry Thomas – a name, synonymous with the first golden age of the cocktail.

Although no bottles of the Jerry Thomas era ever surfaced, the common belief is that Bogart’s was a kind of misspelling of Boker’s Bitters at that time. Still the impact for the development of the cocktail is without question.
